Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 June 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This office action is in response to Paper No: 18, in which applicant elected group I, claims 1-8 without traverse. Applicant further elected the following species without traverse: Arg-34-GLP-1(7-37)-OH, spacer gamma Glu, and Arg34Lys26(N-gamma-glutamyl(N-hexadecanoyl))-GLP-1(7-37)-OH.

Claims 1-8 are pending.

Information Disclosure Statement

The information disclosure statement filed 5/7/01 (Paper No: 5) is acknowledged. A signed copy is attached hereto.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "optionally", it is unclear whether the lipophilic substituent is necessary for the operation of the invention.

Art Unit: 1654

Claims 2-8 are included in this rejection for depending upon a rejected claim.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hermeling, USPN 6,380,357.

The instant invention is drawn to a pulmonary liquid or dry formulation comprising a GLP-1 compound, SEQ ID NO:1, wherein a lipophilic substituent is optionally attached via a spacer.

Hermeling teaches crystals of glucagon-like peptide-1 related molecules that are useful for treating diabetes, obesity and related conditions, see abstract. Hermeling describes SEQ ID NO: 20 (column 25) which is a 45% query match with SEQ ID NO:1 of the instant application, see GenCore version 5.1.6, page 1, result 1. Hermeling teaches the crystals can be formulated for parenteral administration, see column 6, lines 61-62. In Taber's cyclopedic medical dictionary, 15th edition, parenteral is defined as any route other than the alimentary canal, such as mucosal, see page 1234. Further, in Taber's cyclopedic medical dictionary, under medication route, the mucosal routes of administration include absorption through the nasal mucosa, buccal mucosa or

the bronchioles, the latter usually achieved through inhalation of an aerosol, see page 1018.

Absent evidence to the contrary, the glucagons-like peptide-1 crystals of Hermeling would be useful for pulmonary administration.

It would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made to use the crystals of glucagon-like peptide-1 related molecules of Hermeling, because Hermeling teaches the use of the crystals of glucagon-like peptide-1 related molecules for treating diabetes, obesity and related conditions.

Conclusion

All claims are rejected.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (703) 305-4243. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.
